I am a Frontend Developer with over 3 years of experience building clean, scalable, and user-friendly web applications. I enjoy transforming UI/UX designs into responsive digital experiences while focusing on performance, accessibility, and maintainable code.

## PROFESSIONAL EXPERIENCE

---

### Intern Frontend Engineer — Trinixbyte Solutions Limited

*GIDETECH, SOFTWARE | Dec 2025 – Present*

- Currently interning as a Front-End Engineer, contributing to real-world web applications using modern frontend technologies.
- Build responsive user interfaces, implement UI/UX designs, and collaborate with cross-functional teams to deliver efficient web solutions.

### Frontend Instructor — Gide Tech Software Educational Consult

*GIDETECH, SOFTWARE | Jul 2020 – Dec 2022*

- Designed and developed responsive websites and web applications while teaching frontend technologies including HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap, and Next.js.
- Created practical projects and structured lesson plans to help learners gain hands-on development experience.
- Translated UI/UX designs into functional interfaces, integrated APIs, and maintained clean, scalable codebases.
- Provided mentorship, code reviews, and guidance on responsive design, optimization, and industry best practices.

## EDUCATION

---

### Ladoke Akintola University of Technology, Ogbomosho

*B.Tech Cyber Security Science*

Built a strong foundation in programming, networking, and system security while simultaneously pursuing self-directed frontend development training and real-world projects.
